

VINYL RIGID CORE
SPC FLOORING

SPC FLOORING

Waterproof · Fireproof · No Formaldehyde · Interlock Install

VINERA TILE

Production

Fully hot pressing and continuous laminating production lines from Germany have achieved all standards of vinyl surface material specifications, and unmanned assembly line equipment ensures the quality of each luxury vinyl is stable and high-quality. The automatic conveying and metering system that can achieve a metering accuracy of three thousandths provides the quality of our products.

The raw material stone plastic floor

We select raw materials that comply with international regulations, such as ROHS and REACH, in the recipe setting. We have passed the detection of indoor VOCs in various countries. We use phenol-free virgin vinyl and solvent-free surface coatings. Our products do not contain formaldehyde, heavy metals, etc., they are harmless to people and the environment.

STONE PLASTIC FLOOR STRUCTURE

The advantage of stone plastic floor

SPC flooring environmental performance is much better than that of laminate flooring, no formaldehyde emission; its material is recyclable and environment. SPC flooring provides superior water & erosion resistance let you install especially in high moisture areas, including bathrooms, kitchens, basement and laundry rooms, it is ideal choices for residential use. It is fire retardant and with high heat resistance compared with solid wood or laminated flooring.

Unilin Click Installation

Adopting UNILIN locking system, the installation is easier and faster, - flooring planks lay together without glue. Tight & even interlock technology avoids crash of edges and water leakage, protects for a lifetime of beauty.

4-side beveled edges are available to enhance three-dimensional feel and increase its realistic texture.
